Data in Many Forms...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer printouts, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Small Area and Administrative Data Division
Statistics Canada, Ottawa, K1A 0T6
Customer Service: (613) 951-9720

or to the Statistics Canada reference centre in:

Des données sous plusieurs formes...

Statistique Canada diffuse les données sous diverses formes. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingué et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toute demande de renseignements au sujet de la présente publication ou de statistiques et services connexes doit être adressée à :

Division des données régionales et administratives
Statistique Canada, Ottawa, K1A 0T6
Service à la clientèle : (613) 951-9720

ou au centre de consultation de Statistique Canada à :

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

... figures not appropriate or not applicable.

x confidential to meet secrecy requirements of the Statistics Act.

0 indicates a percentage of less than half of one percent.

This publication was prepared by the staff of the Small Area and Administrative Data Division.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada :

... n'ayant pas lieu de figurer.

x confidentiel en vertu des dispositions de la Loi sur la statistique relative au secret.

0 indique un pourcentage de moins de la moitié d'un pour cent.

La présente publication a été rédigée par le personnel de la Division des données régionales et administratives.

SELECTED HIGHLIGHTS

■ Canada, Provinces and Territories

The number of individuals filing 1988 T1 Personal Income Tax returns in Canada was 17,213,150. This represents a 14% increase since 1983 and an increase of 3.5% from 1987. 84.1% of the Canadian population aged 15 and over filed a tax return in 1988.

The largest five year increase in the number of taxfilers was for the Yukon (17%) and the smallest increases were for Saskatchewan and Manitoba (6%). The range of annual increases was from 0.5% (Saskatchewan) to 4.5% (British Columbia).

Median total income for all taxfilers was \$17,200. Median income for females (\$12,200) was 51.2% of that for males (\$23,600).

Median total income for the Yukon was 23% higher than for Canada, while the level for Newfoundland was 29% lower. Ontario and Quebec had median incomes 12% higher and 7% lower than the national figure, respectively.

Nearly one person in two (49%) in Newfoundland who reported some income from a labour force attachment (employment income or Unemployment Insurance) reported Unemployment Insurance income. At the other end of the scale, the comparable figure for Ontario was 14%.

■ Sub-Provincial Areas

Considerable intra-provincial variation in incomes exist. For instance, the 4875 taxfilers in Labrador City had a median income 52% higher than the national figure and 115% higher than the provincial median for Newfoundland.

FAITS SAILLANTS

■ Canada, provinces et territoires

Le nombre de personnes ayant complété une déclaration de revenus des particuliers (T1) au Canada en 1988 s'est établit à 17 213 150. Ceci représente une hausse de 14% par rapport à 1983 et de 3,5% par rapport à 1987. 84,1 % de la population canadienne âgée de 15 ans et plus ont rempli une déclaration d'impôt en 1988.

La plus forte hausse au cours des cinq dernières années a été enregistrée au Yukon (17%), tandis que les hausses les plus faibles ont été enregistrées en Saskatchewan et au Manitoba (6%). Les augmentations annuelles varient entre 0,5% (Saskatchewan) à 4,5% (Colombie-Britannique)

Le revenu total médian pour l'ensemble des déclarants s'est établit à 17 200 \$. Le revenu total médian des femmes (12 200 \$) correspond à 51,2% de celui des hommes (23 600 \$).

Le revenu total médian au Yukon est de 23% supérieur à celui de l'ensemble du Canada, tandis que le niveau de revenu pour Terre-Neuve est de 29% inférieur. Le revenu médian en Ontario et au Québec est de 12% supérieur et de 7% inférieur à la moyenne nationale, respectivement.

Environ une personne sur deux (49%) à Terre-Neuve ayant déclaré un revenu découlant de leur activité sur le marché du travail (revenu d'emploi ou d'assurance-chômage) a déclaré un revenu d'assurance-chômage. À l'autre extrémité, le chiffre comparable pour l'Ontario s'est établit à 14%.

■ Régions infraprovinciales

Il existe un écart considérable dans les revenus au niveau infraprovincial. Par exemple, 4 875 déclarants dans la ville de Labrador ont déclaré un revenu de 52% supérieur à la moyenne nationale et de 115% supérieur à la médiane provinciale pour Terre-Neuve.

One in three taxfilers in FSA⁽¹⁾ H3Y (Westmount) reported an income above \$50,000 while approximately one in six had an income above \$100,000. All other FSAs with at least 1000 taxfilers and a minimum of 10% reporting incomes over \$100,000 are located in Toronto (nine in all, primarily running on a line east of Yonge at the 401 to the Toronto Islands).

In general, taxfiler median incomes in major cities are higher than the median incomes of the provinces in which they are located. The major exception to this is Montreal, where the median income is 98% of the provincial median income for Quebec.

Despite the high incomes of urban dwellers compared to their rural counterparts, most major cities have areas where the majority of taxfilers report low incomes. The most pronounced of these, at a FSA level of aggregation, are V6A and V6B (just east of downtown in Vancouver) where taxfiler median incomes are \$5,600 and \$6,400 respectively. These compare to a median income of \$18,600 for Vancouver. The median incomes for these two areas have declined 27% and 43% since 1983.

The median income for taxfilers in Nova Scotia was 87% of that for all taxfilers in Canada. However, over 30% of Nova Scotia taxfilers lived in postal code areas where the median income was above the national level.

Five of the ten areas with the highest median incomes for males and with at least 1000 taxfilers have resource based economies. They are Fort McMurray, Alberta (T9K - \$58,500 and T9J - \$49,400), Fermont, Quebec (G0G 1J0 - \$47,100), Tumbler Ridge, B.C. (V0C 2W0 - \$46,400) and Sparwood, B.C. (V0B 2G0 - \$45,200). The other five were Montreal (H3Y), Oakville (L6M), Edmonton (T6R), Yellowknife (X1A) and Oshawa (L1R).

Dans la RTA⁽¹⁾ H3Y (Westmount), un déclarant sur trois a indiqué un revenu supérieur à 50 000 \$ et approximativement un sur six a déclaré un revenu supérieur à 100 000 \$. Toutes les autres RTA, notamment celles comptant au moins 1 000 déclarants et ayant un minimum de 10% déclarant des revenus de 100 000 \$ et plus, se retrouvent dans la région de Toronto (9 régions en tout, formant une ligne à l'est de la rue Yonge, à partir de la 401 jusqu'au Toronto Islands.).

Les revenus médians dans les principales villes sont généralement plus élevés que les revenus médians de leur province respective. La seule exception majeure, cependant, est Montréal, où le revenu médian correspond à 98% de celui de la province de Québec.

Malgré les revenus élevés des ménages urbains par rapport à leurs homologues ruraux, la plupart des grandes villes ont des secteurs où une grande partie des déclarants a indiqué un faible revenu. Les plus touchés, en utilisant la RTA comme niveau d'agrégation, sont le V6A et le V6B (à l'est du centre-ville de Vancouver) où les revenus médians des déclarants sont de 5 600 \$ et 6 400 \$ respectivement. Ces données se comparent à un revenu médian de 18 600 \$ pour la ville de Vancouver. Les revenus médians pour ces deux régions ont chuté de 27% et 43% depuis 1983.

Le revenu médian des déclarants en Nouvelle-Écosse correspond à 87% de celui enregistré pour l'ensemble des déclarants au Canada. Cependant, plus de 30% des déclarants en Nouvelle-Écosse résident dans des régions délimitées à partir du code postal où le revenu est supérieur à la moyenne nationale.

Cinq des dix régions présentant les revenus médians les plus élevés chez les hommes et comptant au moins 1 000 déclarants reposent sur une économie de matières premières. Il s'agit de Fort McMurray, Alberta (T9K - 58 500 \$ et T9J 49 400 \$), Fermont, Québec (G0G 1J0 - 47 100 \$), Tumbler Ridge, C.-B. (V0C 2W0 - 46 400 \$) et Sparwood, C.-B. (V0B 2G0 - 45 200 \$). Les cinq autres régions sont Montréal (H3Y), Oakville (L6M), Edmonton (T6R), Yellowknife (X1A) et Oshawa (L1R).

With the exception of H3E in Montreal, the ten areas having at least 1,000 taxfilers and the highest female median incomes are FSAs in Toronto.

There are high concentrations of taxfilers aged 65 and over in the Vancouver and Victoria areas. Examples include Victoria (V8V - 36%, V8S - 31%), White Rock (V4B - 35%), Vancouver (V7T - 33%) and Sidney (V8L - 31%).

The highest percentages of taxfilers reporting Unemployment Insurance income compared to taxfilers with income from a labour force attachment (UI%) are found in the rural areas of Atlantic Canada. Five of the ten communities, having at least 1000 taxfilers, with the highest UI% are located in New Brunswick. On the other hand, the areas with the lowest UI% are urban and primarily located in Southern Ontario.

The socio-economic characteristics of Regina and Saskatoon are similar. There were 119,300 taxfilers in Saskatoon (13% increase in the last five years) and 118,075 in Regina (9% increase). 57% of taxfilers in Saskatoon were married, compared to 56% in Regina. Median total income in Regina was 25% higher than for Saskatchewan, while it was 15% higher in Saskatoon. The percentage of taxfilers reporting UI income to those reporting either employment or Unemployment Insurance income was 16% in Regina and 18% in Saskatoon. 26,725 taxfilers in Regina reported Family Allowance benefits. The comparable figure in Saskatoon was 26,800.

À l'exception du H3E à Montréal, les dix régions comptant plus de 1 000 déclarants et où l'on retrouve le revenu médian le plus élevé chez les femmes sont des RTA appartenant à la région de Toronto.

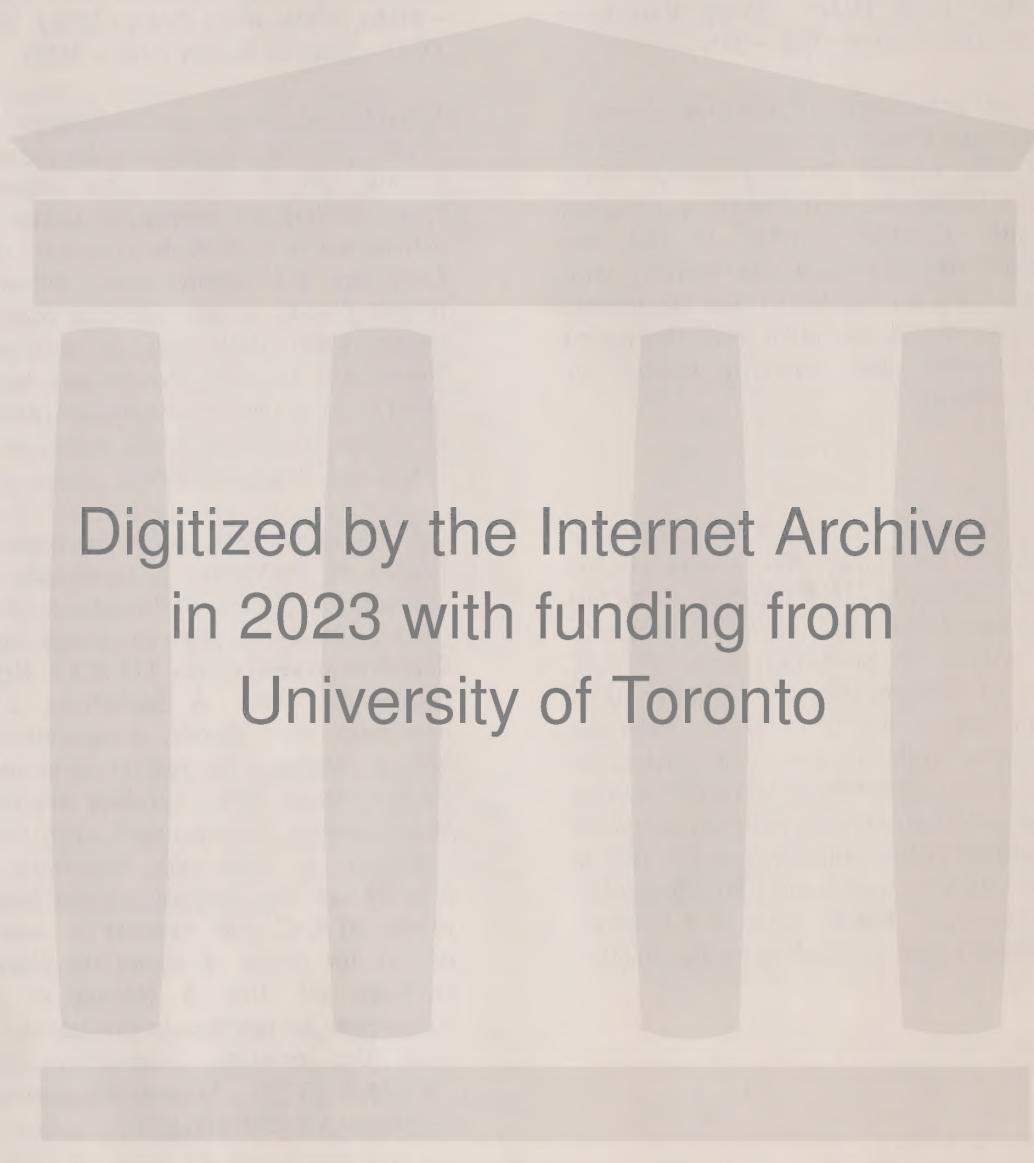

Il y a des concentrations de déclarants âgés de 65 ans et plus à Vancouver et à Victoria. Voici quelques exemples : Victoria (V8V - 36%, V8S - 31%), White Rock (V4B - 35%), Vancouver (V7T - 33%) et Sidney (V8L - 31%).

Les régions rurales de l'Atlantique figurent parmi celles où l'on retrouve les pourcentages les plus élevés de déclarants par rapport à ceux ayant indiqué un revenu découlant de leur activité sur le marché du travail (% d'A.-C.). Cinq des dix communautés présentant le revenu d'A.-C. le plus élevé et comptant au moins 1 000 déclarants se retrouvent au Nouveau-Brunswick. Par ailleurs, les régions que l'on retrouve principalement dans le sud de l'Ontario figurent parmi celles qui ont les taux d'A.-C. les moins élevés.

Les caractéristiques socio-économiques de Regina et Saskatoon sont similaires. On dénombre 119 300 déclarants à Saskatoon (13% d'augmentation au cours des cinq dernières années) contre 118 075 à Regina (en hausse de 9%). À Saskatoon, 57% des déclarants sont mariés, comparativement à 56% à Regina. Le revenu total médian à Regina est de 25% supérieur à celui de la Saskatchewan, tandis qu'il est de 15% supérieur à celui de Saskatoon. Le pourcentage des déclarants ayant indiqué un revenu d'A.-C. par rapport à ceux ayant déclaré un revenu d'emploi ou d'assurance-chômage est 16% à Regina et 18% à Saskatoon. Le nombre de déclarants à Regina ayant des revenus d'allocations familiales s'établit à 26 725. Le nombre comparable à Saskatoon s'établit à 26 800.

(1) Forward Sortation Area (FSA): This refers to the first three digits of the postal code in an urban area.

(1) Région de tri d'acheminement (RTA): Ce niveau géographique est identifié par les trois premiers caractères du code postal à l'intérieur d'une région urbaine.

Digitized by the Internet Archive
in 2023 with funding from
University of Toronto

<https://archive.org/details/31761117134361>

5. Taxfilers reporting Family Allowance income.

For taxfilers with Family Allowance income, the number reporting and the aggregate dollars are provided.

The first two pages of Table 1 provide summary data for Canada and the provinces. In addition, the first two lines of subsequent pages provide data for Canada that can be quickly compared to the provincial figures.

Appendices

Appendix A contains additional information on Table 1 column headings, which are very brief.

Appendix B is a cross-referenced list of postal codes. Because Table 1 is arranged alphabetically by place name, this list has been ordered by postal code.

Appendix C describes other data products available from the Small Area and Administrative Data Division.

Confidentiality and Rounding

To preserve the confidentiality of individuals, data are released with the following restrictions:

1. There must be at least 100 taxfilers in a region (a region is represented by one line of data);
2. Each cell must represent at least 25 taxfilers.

All counts have been rounded to the nearest multiple of 25 and all income medians have been rounded to the nearest \$100 or, in the case of aggregates, to the nearest \$1,000.

Aggregate dollars have been screened to eliminate dominance (when the income of a taxfiler contributes a large portion of the total for the area).

5. Données sur les personnes ayant déclaré un revenu d'allocations familiales.

Le nombre de déclarants ayant reçu un revenu d'allocations familiales et le montant total des allocations sont présentés.

Les deux premières pages du tableau 1 présentent des données sommaires pour l'ensemble du Canada et pour chacune des provinces. De plus, les deux premières lignes des pages suivantes présentent des données pour le Canada que l'on peut comparer rapidement avec les données provinciales.

Appendices

L'appendice A comprend des renseignements additionnels sur les en-têtes du tableau, lesquelles sont très brèves.

L'appendice B sert à faciliter le lien entre un code postal et sa localité. Étant donné que le tableau 1 est classé par ordre alphabétique du nom de la localité, la liste de l'appendice B est présentée par ordre de code postal.

L'appendice C donne un aperçu des autres produits de la Division des données régionales et administratives.

Confidentialité et arrondissement

Afin de préserver la confidentialité des déclarants à l'impôt, les données sont publiées selon les restrictions suivantes :

1. Il doit y avoir au moins 100 déclarants dans une région donnée (une région est représentée par une ligne de données);
2. Chaque cellule doit compter au moins 25 déclarants.

Tous les nombres ont été arrondis à un multiple de 25, les revenus médians sont arrondis aux 100 \$ près et les montants totaux aux 1 000 \$ près.

Les montants totaux exprimés en dollars ont été traités de façon à éliminer le problème statistique de la dominance (là où le revenu d'un déclarant à l'impôt représente une forte proportion de la somme des revenus des déclarants pour la région en question).

When data have been suppressed because of confidentiality requirements, the cell contains an "X".

Data Quality

The data are direct counts from tax files. No adjustments have been made to allow for undercoverage, or to benchmark the data to other income estimates. Adjusted data for census divisions and subprovincial areas are available in *Income estimates for subprovincial areas* (Catalogue 13-216).

In 1988, about 66% of all Canadians filed tax returns, compared to about 61% in 1985. This increase is partly explained by the introduction, in 1986, of the Federal Sales Tax Credit.

| Year | Number of Taxfilers ('000s) | Population ('000s) | % |
|------|--------------------------------|-----------------------|------|
| 1985 | 15,546 | 25,359 | 61.3 |
| 1986 | 15,865 | 25,309 | 62.7 |
| 1987 | 16,638 | 25,625 | 64.9 |
| 1988 | 17,213 | 25,912 | 66.4 |

Most children and a proportion of the elderly (those who received only Old Age Security and Guaranteed Income Supplement) do not file because they have low or non-taxable income. Since the introduction of the Federal Sales Tax Credit in 1986, however, the percentage of the elderly population filing tax returns has increased.

| Age group | 1988 Number of Taxfilers ('000s) | June 1, 1989 Population Estimates ('000s) | % |
|-----------|---|--|------|
| | | | |
| <20 | 872 | 7,761 | 11.2 |
| 20-24 | 1,913 | 2,042 | 93.7 |
| 25-44 | 8,089 | 8,739 | 92.6 |
| 45-64 | 4,232 | 5,092 | 83.1 |
| >64 | 2,106 | 2,971 | 70.9 |

(1) Preliminary postcensal estimates of population from the publication 91-210.

Lorsque les données sont supprimées pour des raisons de confidentialité, elles sont remplacées par un «X».

Qualité des données

Les données sont tirées directement des fichiers d'impôt. Aucun ajustement n'a été apporté afin de tenir compte du sous-dénombrement de la population; de même, aucun étalonnage par rapport à d'autres agrégats du revenu n'a été effectué. Des données ajustées au niveau des divisions de recensement et d'autres régions infraprovinciales sont disponibles dans la publication intitulée *Estimations du revenu dans les secteurs infraprovinciaux* (no 13-216 au catalogue).

En 1988, environ 66% des Canadiens ont produit une déclaration de revenus, comparativement à environ 61% en 1985. L'augmentation du taux de déclaration s'explique en partie par l'introduction, en 1986, du Crédit pour la taxe fédérale sur les ventes.

| Année | Nombre de déclarants (milliers) | Population (milliers) | % |
|-------|------------------------------------|--------------------------|------|
| 1985 | 15 546 | 25 359 | 61,3 |
| 1986 | 15 865 | 25 309 | 62,7 |
| 1987 | 16 638 | 25 625 | 64,9 |
| 1988 | 17 213 | 25 912 | 66,4 |

La plupart des enfants et une proportion des personnes âgées (celles n'ayant pour revenus que la pension de vieillesse et le supplément de revenu garanti) ne produisent pas de déclaration en raison d'un faible revenu ou d'un revenu non imposable. Il y a eu une augmentation du nombre de personnes âgées produisant des déclarations sur le revenu depuis l'introduction du Crédit pour la taxe fédérale sur les ventes en 1986.

| Groupe d'âge | Nombre de déclarants 1988 (milliers) | 1er juin 1989 Estimation de population (milliers) | % |
|--------------|--|--|------|
| <20 | 872 | 7 761 | 11,2 |
| 20-24 | 1 913 | 2 042 | 93,7 |
| 25-44 | 8 089 | 8 739 | 92,6 |
| 45-64 | 4 232 | 5 092 | 83,1 |
| >64 | 2 106 | 2 971 | 70,9 |

(1) Estimations postcensitaires provisoires de la population provenant de la publication no 91-210.

INTRODUCTION

Data Source

The data in this publication are derived from income tax returns for 1988, which were, for the most part, filed in the spring of 1989. The mailing address at the time of filing is the basis for the geographic information in the tables.

Demographic characteristics such as age and marital status are given as of December 31, 1988. Income information is for the 1988 calendar year.

Organization

Under each place name heading of post office, data are listed by Forward Sortation Area (FSA) in urban areas, and by individual postal code in rural areas.

The FSA is designated by the first three characters of the postal code (e.g. T5A). Within each FSA there are many postal codes classified by the type of mail delivery:

- to a specific residential address;
- to a specific business address;
- to a rural route on the fringe of an urban area;
- to a locked box near a new subdivision (suburban service);
- to a locked box at a post office;
- to general delivery at a post office.

In some urban areas, there are postal codes for rural routes (RR) and suburban services (SS). These postal codes are shown separately in the publication and are included in the place name total provided for each area containing more than one FSA.

INTRODUCTION

Source des données

Les données contenues dans la présente publication sont tirées des déclarations de revenus des particuliers pour l'année 1988. L'information géographique que l'on retrouve dans les tableaux est obtenue à partir des adresses postales inscrites sur les déclarations au moment où elles ont été remplies, soit, pour la plupart, au printemps de l'année 1989.

Les caractéristiques démographiques telles que l'âge et l'état matrimonial sont en date du 31 décembre 1988. Quant aux données sur le revenu, elles correspondent aux revenus déclarés pour l'année civile 1988.

Organisation

Pour chaque nom d'un bureau de poste d'une localité, les données sont présentées selon les régions de tri d'acheminement (RTA) du courrier pour les régions urbaines, et selon les codes postaux individuels pour les régions rurales.

Une RTA est identifiée par les trois premiers caractères du code postal (p. ex. T5A). Dans une RTA, on retrouve plusieurs codes postaux classés selon le type de distribution du courrier, c'est-à-dire :

- à une résidence spécifique;
- à une adresse spécifique d'entreprise;
- à une route rurale en périphérie d'une région urbaine;
- à une case près d'une nouvelle banlieue (service de banlieue);
- à une case au bureau de poste;
- à la poste restante.

Dans certaines régions urbaines, il existe des codes postaux représentant la route rurale (RR) et le service de banlieue (SS). Ces codes sont inscrits séparément dans la publication et sont inclus dans le total pour le nom de la localité, lorsqu'on retrouve plusieurs RTA dans une même région.

Postal codes for rural routes and suburban service areas indicate the location of the post office; they do not indicate the taxfiler's place of residence.

Data for non-residential addresses within urban FSAs have been grouped in a "Other" category for each place name.

Rural postal codes designate postal service offered from a rural community to the surrounding area. They can be identified by a six digit postal code with a "0" in the second and sixth positions.

Table Contents

The data are presented in five sections:

1. All taxfilers.

Demographic characteristics are given.

2. Taxfilers reporting any income.

Some filers have no taxable income but file for other reasons, such as to claim a Child Tax Credit. For taxfilers reporting some income, medians and distribution of total income are given.

In 1988, total income was broadened to include money received from the Child Tax Credit or the Federal Sales Tax Credit. As a result, caution should be used with historical comparisons of this variable.

3. Taxfilers reporting employment income and/or unemployment insurance benefits.

A number of demographic characteristics are given.

4. Taxfilers reporting employment income.

Medians by sex are given.

Les codes postaux relatifs aux routes rurales et au service de banlieue indiquent l'emplacement du bureau de poste et non celui de la résidence du déclarant.

Les données pour les adresses non résidentielles des RTA urbaines ont été groupées sous la rubrique «Other» (autres) selon chaque nom de localité.

Les codes postaux ruraux sont utilisés pour la distribution du courrier dans les communautés rurales et leurs régions environnantes. Les deuxième et sixième caractères du code postal rural sont identifiés par un «0».

Contenu des tableaux

Les données sont présentées en cinq sections:

1. Données sur tous les déclarants.

Les caractéristiques démographiques sont présentées pour tous les déclarants.

2. Données sur les déclarants qui ont indiqué un revenu quelconque.

Certains déclarants ne reçoivent aucun revenu imposable, mais préparent une déclaration d'impôt pour d'autres raisons, par exemple, pour réclamer le Crédit d'impôt pour enfants. Le revenu total médian ainsi que la répartition du revenu total sont présentés pour les déclarants ayant un revenu quelconque.

En 1988, le revenu total a été élargit afin d'inclure tout argent reçu du Crédit d'impôt pour enfants ou du Crédit pour la taxe fédérale sur les ventes. Par conséquent, les utilisateurs devront comparer les données chronologiques avec prudence.

3. Données sur les personnes ayant déclaré un revenu d'emploi et (ou) de prestations d'assurance-chômage.

Un certains nombre de caractéristiques démographiques sont présentées pour ces personnes.

4. Données sur les déclarants ayant indiqué un revenu d'emploi.

Le revenu d'emploi médian est donné, selon le sexe.

Values were imputed when missing for age (0.4% of taxfilers), sex (0.2% of taxfilers) and marital status (6.4% of taxfilers).

All income data are unadjusted. Because some persons with low income have no tax liability and therefore do not file tax returns, income measures such as medians have an upward bias. Comparing the tax median to figures from Statistics Canada's annual Survey of Consumer Finances (SCF) for 1988 makes this clear:

| | |
|-------------------|----------|
| Tax median income | \$17,200 |
| SCF median income | \$16,399 |
| Difference | 4.6% |

Householder Counts

The publications Householder Figures for Letter Carrier Offices and Householder Figures for Non Letter Carrier Offices are available from your local post office. To obtain data on magnetic tape, please contact:

Maps

FSA maps are included in the householder publication described above. Larger scale maps are available from:

REGIONAL HEADQUARTERS
Postal Code Management
Canada Post Corporation
Sir Alexander Campbell Building
Ottawa, Ontario
K1A 0B1

Les valeurs manquantes ont été imputées pour des variables telles que l'âge (pour 0,4% des déclarants), le sexe (pour 0,2% des déclarants) et l'état matrimonial (pour 6,4% des déclarants).

Les données sur le revenu n'ont subi aucun ajustement. Puisque certaines personnes à faible revenu ne sont pas nécessairement assujetties à l'impôt et, par conséquent, peuvent ne pas produire de déclaration de revenus, les indicateurs de revenus sont biaisés à la hausse. L'enquête annuelle sur les finances des consommateurs (EFC) de Statistique Canada pour 1988 le démontre:

| | |
|--------------------------------|-----------|
| revenu médian, fichier d'impôt | 17 200 \$ |
| revenu médian, EFC | 16 399 \$ |
| différence | 4,6% |

Nombre de chefs de ménage

Les publications Nombre de chefs de ménage pour les bureaux avec facteurs et Nombre de chefs de ménage pour les bureaux sans facteurs sont disponibles à votre bureau de poste local. Si vous désirez obtenir ces données sur ruban magnétique, prière de vous adresser à :

Additional Data

These statistics were first compiled for the 1984 tax year. For 1984 to 1986, see catalogue 17-602. Data for the 1987 tax year can be found in several publications, including 17-202, 17-203, 17-204, 17-205 and 17-206.

Data for each year are available on diskette (comma-delimited file) and on magnetic tape (1600 or 6250 BPI). The diskettes are in ASCII format and the magnetic tapes are either in ASCII or EBCDIC format.

More detailed data by postal code area are available from the **Small Area and Administrative Data Division** of Statistics Canada.

Appendix C describes other tax data for small areas.

For further information please contact:

Customer Services at (613) 951-9720

Fax: (613) 951-4745

Données supplémentaires

Ces données ont été compilées pour la première fois à partir de l'année financière 1984. Les données pour les années financières 1984, 1985 et 1986 sont parues dans la publication no 17-602. Pour l'année financière 1987, elles sont parues dans les publications no 17-202, 17-203, 17-204, 17-205 et 17-206.

Les données pour chaque année sont disponibles sur disquette (les données sont délimitées par une virgule) ainsi que sur ruban magnétique (1600 ou 6250 BPI). Les disquettes sont codées ASCII et les rubans magnétiques, ASCII ou EBCDIC.

Des données détaillées, selon les régions définies par les codes postaux, sont disponibles également à la **Division des données régionales et administratives** de Statistique Canada.

L'appendice C décrit d'autres données disponibles pour les petites régions.

APPENDICE A

Description des en-têtes des colonnes

Les variables inscrites au tableau 1 ne sont définies que très brièvement. Le présent appendice donne des renseignements additionnels.

Colonne :

1 Région

Le nom de la localité représente une région rurale ou urbaine. Généralement, lorsqu'il s'agit d'une région rurale, une seule ligne de données apparaît. Dans le cas d'une région urbaine, plusieurs lignes de données peuvent figurer sous le même nom. Chaque ligne de données correspond à l'une des cinq classes de régions géographiques:

1. Une RTA suivie de «-1» (p.ex. T1A-1). Cette ligne comprend des données qui correspondent aux différents codes postaux représentant une adresse résidentielle dans la RTA.
2. Un code postal suivi de «RR» (p.ex. T1A1R5-RR). Ce code postal désigne une route rurale desservie à partir d'une localité urbaine. Les déclarants ayant un tel code postal peuvent ne pas demeurer à l'intérieur des limites de la RTA.
3. Un code postal suivi de «SS» (p.ex. T1A2T6-SS). Ce code postal désigne une région à service de banlieue où la distribution du courrier se fait à partir d'un bureau de poste. Ici encore, les personnes ayant un tel code postal peuvent ne pas demeurer à l'intérieur des limites de la RTA.
4. OTHER (apparaît dans la publication pour «autres»). Cette ligne regroupe les déclarants qui utilisent une adresse d'entreprise, une case au bureau de poste ou la poste restante dans la région. Elle comprend aussi les secteurs ayant moins de 100 déclarants à l'intérieur de la région.
5. La ligne «TOTAL». Cette ligne fournit le total des données pour toutes les entrées ayant le même nom. Habituellement, cette ligne correspond à une région urbaine. À cause de l'arrondissement des données, le total peut ne pas correspondre à la somme des valeurs individuelles.

A - Tous les déclarants

2 Nombre

Cette variable indique le nombre total de particuliers qui ont rempli une déclaration de revenus pour l'année civile 1988.

3 Variation en pourcentage de 1983 à 1988

Cette colonne indique la variation en pourcentage du nombre total de déclarants de 1983 à 1988.

4 Proportion des déclarants de sexe féminin

Cette colonne indique le pourcentage des effectifs féminins par rapport au nombre total de déclarants.

5 Proportion des déclarants mariés

Cette variable donne le pourcentage des déclarants qui ont indiqué avoir été mariés au 31 décembre 1988.

6 à 9 Répartition selon le groupe d'âge

Ces colonnes indiquent le pourcentage du nombre total de déclarants qui, le 31 décembre 1988, appartenaient aux groupes d'âge suivants :

| <u>Colonne</u> | <u>Groupe d'âge</u> |
|----------------|---------------------|
| 6 | moins de 25 |
| 7 | 25-44 |
| 8 | 45-64 |
| 9 | plus de 64 |

10 Proportion en appartement

Cette variable indique le pourcentage de déclarants qui demeurent dans des immeubles à logements de plus de 50 unités.

B - Déclarants ayant un revenu

En 1988, presque 100% des déclarants ont indiqué qu'ils avaient un revenu quelconque selon la nouvelle définition du revenu donné ci-dessous. Les colonnes 11 à 23 présentent des données pour ce groupe.

Le revenu total comprend le revenu d'emploi, le revenu de pension, le revenu d'emploi autonome (c.-à-d. revenu net provenant d'un commerce, revenu professionnel, agricole, de la pêche ou encore revenu net sous forme de commissions) et revenus en provenance d'autres sources (c.-à-d. allocations familiales, prestations d'assurance-chômage, intérêts et autres revenus d'investissement, revenus nets de location, le Crédit pour la taxe fédérale sur les ventes, le Crédit d'impôt pour enfants, revenu de pension alimentaire, revenu d'association et revenu d'un REÉR).

11 Nombre

Cette colonne donne le nombre de déclarants qui ont indiqué avoir reçu un revenu quelconque en 1988.

12 à 17 Proportion des revenus plus élevés que

Ces variables indiquent les pourcentages de déclarants ayant des revenus plus élevés que les limites fixées:

| <u>Colonne</u> | <u>Limite</u> |
|----------------|---------------|
| 12 | 15 000 \$ |
| 13 | 25 000 \$ |
| 14 | 35 000 \$ |
| 15 | 50 000 \$ |
| 16 | 75 000 \$ |
| 17 | 100 000 \$ |

18 à 20 Revenu total médian

Ces colonnes indiquent le revenu total médian arrondi aux 100 \$ près. La moitié des déclarants ayant un revenu ont indiqué avoir un revenu moindre ou égal au revenu médian.

| <u>Colonne</u> | <u>Catégorie</u> |
|----------------|------------------|
| 18 | Femmes |
| 19 | Hommes |
| 20 | Les deux sexes |

21 Indice par rapport à la médiane canadienne

Cet indice situe le revenu total médian des deux sexes (colonne 20) pour la région par rapport à la médiane correspondante pour le Canada. En 1988, le revenu total médian canadien pour les deux sexes était de 17 200 \$ (indice = 100). Par exemple, un indice de 120 indique que le revenu total médian pour la région est supérieur de 20% à la médiane canadienne.

22 Indice par rapport à la médiane provinciale

Le revenu total médian de 1988, pour les deux sexes (colonne 20), selon la région définie à partir du code postal est comparé à la médiane provinciale et identifié comme «indice». Un indice de 80, par exemple, indique que le revenu total médian pour une région spécifique est de 20% inférieur à la médiane provinciale.

23 Variation en pourcentage du revenu médian de 1983 à 1988

Cette colonne indique la variation en pourcentage du revenu total médian de 1983 à 1988. La nouvelle définition du revenu a été appliquée aux données de 1983.

C - Déclarants ayant un revenu d'emploi et (ou) de prestations d'assurance-chômage

Les données présentées aux colonnes suivantes s'appliquent aux déclarants qui ont indiqué un revenu d'emploi ou de prestations d'assurance-chômage, ou les deux. En 1988, ces déclarants représentaient 80% de tous les déclarants.

Le revenu d'emploi comprend les traitements et salaires, les commissions selon les feuillets T4, les allocations de formation, les pourboires et gratifications, ainsi que tout revenu provenant d'un emploi autonome.

24 Nombre

Cette colonne donne le nombre de déclarants ayant reçu un revenu d'emploi et (ou) de prestations d'assurance-chômage en 1988.

25 Proportion de sexe féminin

Cette variable indique le pourcentage des effectifs féminins parmi les déclarants indiqués à la colonne 24.

26 Proportion des prestataires d'assurance-chômage

Cette variable donne le pourcentage d'individus qui, parmi ceux inclus à la colonne 24, ont déclaré avoir reçu des prestations d'assurance-chômage en 1988.

D - Tous ceux qui ont déclaré un revenu d'emploi

Les données présentées dans les colonnes 27 à 29 s'appliquent aux déclarants qui ont indiqué un revenu d'emploi. Le revenu d'emploi comprend les traitements et salaires, les commissions selon les feuillets T4, ainsi que tout revenu provenant d'un emploi autonome.

27 à 29 Revenu d'emploi médian

La moitié des déclarants représentés dans cette catégorie ont indiqué un revenu d'emploi inférieur ou égal à la médiane. Ces colonnes indiquent le revenu d'emploi médian, arrondi aux 100 \$ près.

| <u>Colonne</u> | <u>Catégorie</u> |
|----------------|------------------|
| 27 | Hommes |
| 28 | Femmes |
| 29 | Les deux sexes |

E - Tous ceux qui ont déclaré un revenu d'allocations familiales

30 Nombre

Cette colonne donne le nombre de déclarants ayant reçu un revenu d'allocations familiales en 1988.

31 Montant

Cette colonne donne le total des allocations familiales en dollars, arrondis aux 1 000 \$ près.

32 Région

Voir colonne 1.

■ **The Experimental Family Data - If you'd like an informed picture on Canadian families.**

If you need an annual source of information on Canadian families, these experimental data, which are made up of various cross-tabulations, will allow you to focus on two or more characteristics of an area. These data, available through special tabulations, will give you an informed picture of the age, income, composition, size and labour force status of husband-wife families. These tabulations can be produced for communities, cities and towns, or for areas as small as an urban FSA (first three characters of the postal code).

■ **The Forward Sortation Area and Postal Code Databank System - An indispensable tool for analysing the socio-economic profiles of small areas.**

This annually-updated database enables the user to choose a wide range of demographic and socio-economic characteristics of taxfilers from an array of cross-tabulations. This database will prove invaluable to anyone wishing to conduct market research or other regional analysis.

■ **Données expérimentales sur les familles**
- *Si vous cherchez à obtenir un portrait bien précis des familles canadiennes.*

Si vous cherchez une source d'information annuelle sur les familles, ces données se compose de toute une gamme de totalisations croisées. Chaque totalisation peut porter sur deux ou plusieurs caractéristiques d'une région donnée. Cette information, disponible par la voie d'une demande spéciale, donne un portrait de l'âge, du revenu, de la composition, de la taille et du statut dans la population active des familles époux-épouses. Ces totalisations sont disponibles au niveau des cités, villes et communautés, de même que pour des régions aussi petites qu'une RTA urbaine (les trois premiers caractères du code postal).

■ **Système de base de données selon la RTA urbaine et selon les codes postaux ruraux - Un outil indispensable pour analyser le profil socio-économique de la population des petites régions.**

Cette base de données, mise à jour annuellement, permet à l'utilisateur de choisir, parmi toute une gamme de tableaux croisés, différentes caractéristiques démographiques et socio-économiques des déclarants. Cette banque s'avèrera essentielle à toute personne désirant effectuer une analyse de marché ou toute autre étude à caractère régional.

■ **Migration Estimates by Census Division**
- *For a close look at Canadians on the move.*

It has been estimated that about 2% of Canadians move from one province to another and that about 5 % move to another census division within the same province. The migration estimates database provides annual migration data for all census divisions across Canada. Four different tables are currently available, enabling users to select the data that best answer their requirements: population movements for census divisions by province of origin/destination; migration by five gender and age groups; migration by type; and major migration flows by census division of origin/destination.

■ **Unemployment Insurance Statistics - An up-to-date and reliable way of analysing unemployment over time.**

Compiled every month, this database offers two types of unemployment indicators: the first type is a count of unemployment insurance beneficiaries by type of benefit, as well as a distribution of beneficiaries by age group and gender. The second type of indicator is an unemployment insurance to population ratio (UIP). The counts may prove valuable for examining trends within a region, while the UIP ratios may prove more practical in making comparisons among areas. Although the unemployment insurance to population ratio is available at the census division level only, the unemployment insurance counts can be produced for special areas upon request.

■ **Estimations de la migration par divisions de recensement - Pour en savoir plus long sur la mobilité des canadiens.**

D'après les estimations, environ 2% des canadiens changent de province à chaque année et environ 5% changent de division de recensement à l'intérieur d'une même province. Cette base de données annuelle renferme des estimations annuelles de migration pour toutes les divisions de recensement au Canada. Quatre différents tableaux sont disponibles, permettant ainsi aux utilisateurs de choisir les données en fonction de leurs besoins. Les tableaux renferment des données ayant trait aux déplacements de la population entre les divisions de recensement selon la province d'origine et (ou) de destination; la migration par groupe d'âge; la migration selon le genre de migration et les principaux flux migratoires par divisions de recensement.

■ **Statistiques mensuelles sur les bénéficiaires d'assurance-chômage - Une façon fiable et actuelle d'analyser la situation du chômage dans le temps.**

Compilée chaque mois, cette base de données renferme deux types d'indicateurs: le premier est un compte des bénéficiaires selon le genre de prestations d'assurance-chômage, ainsi que la répartition des bénéficiaires selon l'âge et le sexe. Le deuxième type d'indicateur est un Rapport des bénéficiaires d'assurance-chômage/ population. Les comptes peuvent s'avérer utiles pour étudier les tendances pour une région donnée, tandis que le Rapport des bénéficiaires d'assurance-chômage/population peut servir à des fins de comparaison entre régions. Quoique le Rapport des bénéficiaires d'assurance-chômage/population soit disponible pour les divisions de recensement seulement, on peut se procurer les comptes des bénéficiaires d'assurance-chômage pour des régions spéciales sur demande.

APPENDIX C

OTHER PRODUCTS AVAILABLE

The range of data collected from administrative records, such as sources of income, contributions to a registered retirement savings plan and other information, including age, sex, and marital status, has enabled us to create seven demographic and socio-economic databases for geographic units as small as an urban FSA's, rural postal codes and postal walks.

- **Demographic and Income Statistics for Postal Walks - *What better way of identifying your target markets.***

The statistics by postal walk contain essentially the same variables as this annual publication, but at a geographic level corresponding to letter carriers' daily mail delivery routes in urban areas. This database contains up to 28 demographic and socio-economic characteristics for just over 16,000 postal walks across Canada. Thus, if you would like to compare different statistical profiles within a region, community or neighbourhood, this database will undoubtedly meet your needs.

APPENDICE C

AUTRES PRODUITS DISPONIBLES

L'éventail de renseignements recueillis à partir des dossiers administratifs, comme par exemple les sources de revenus, les cotisations à un régime enregistré d'épargne-retraite et d'autres renseignements comme l'âge, le sexe et l'état matrimonial, nous ont permis d'établir sept banques de données démographiques et socio-économiques pour des unités géographiques aussi petites que des régions de tri d'acheminement, des codes postaux ruraux et des itinéraires de facteur.

- **Statistiques démographiques et sur le revenu selon les itinéraires du facteur - *Quoi de mieux pour atteindre vos marchés cibles.***

Les statistiques selon les itinéraires du facteur sont essentiellement les mêmes que celles dont on retrouve dans cette publication annuelle, mais à un niveau géographique correspondant au trajet emprunté à tous les jours par les préposés à la livraison du courrier dans les régions urbaines. On y retrouve jusqu'à 28 caractéristiques démographiques et socio-économiques à l'égard d'un peu plus de 16 000 itinéraires partout au pays. Ainsi, si vous voulez faire la comparaison de portrait statistique d'une région, d'une communauté ou d'un quartier, cette banque de données répondra sûrement à vos besoins.

■ **The RRSP Package - A marketing tool designed to help financial institutions improve their position in the marketplace.**

Would you like to know what your share of the RRSP market is? This unique database is a valuable source of information for evaluating your performance relative to the industry as a whole. Since it contains precise RRSP information for about 23,000 postal areas in Canada, it will enable you not only to determine your share of market at the national and provincial levels, but also for small areas served by your branches.

■ **The Investment Portfolio - If you're looking for a sound investment, this database is for you.**

The investment portfolio is a tool specially designed to make it easier to locate investors and savers. It contains data on "risk-takers" and savers in more than 23,000 postal areas across Canada, ranging from units as large as Canada and the provinces to postal walks (letter carriers' daily delivery routes). This enormous data file can be used for a multitude of purposes: to determine the best location for a new branch; to get the most from an advertising campaign; in short, to make the optimal use of your resources.

■ **La Base de données REÉR - Un outil de commercialisation conçu pour venir en aide aux institutions financières désireuses de se tailler une meilleure place sur le marché.**

Vous cherchez à connaître votre part du marché des REÉR? Avec cette base de données annuelle, vous disposerez également d'une source de données vous permettant d'évaluer votre rendement par rapport à l'industrie dans son ensemble. Grâce à cette base de données, vous serez en mesure de connaître non seulement votre part du marché des REÉR à l'échelle nationale et provinciale, mais aussi au niveau des petites régions que desservent vos succursales.

■ **Le Portefeuille de placements - Pour un bon placement, investissez dans cette banque de données.**

Le Portefeuille de placements est un outil spécialement conçu pour faciliter la localisation des investisseurs et des épargnants. Il renferme des données sur les épargnants et les «preneurs de risque» d'un peu plus de 23 000 régions postales au pays, allant des régions aussi vastes que le Canada et les provinces jusqu'au trajet emprunté par les facteurs pour livrer le courrier à tous les jours. Cet immense fichier d'information peut servir à de multiples fins: par exemple, déterminer le meilleur emplacement pour une nouvelle succursale; tirer le maximum de vos campagnes publicitaires; bref, faire une utilisation optimale de vos ressources.

AND THAT'S NOT ALL ...

The Small Area and Administrative Data Division makes every effort to keep abreast of its users' needs for statistical data. That is why we have such a wide range of "standardized" data. Furthermore, in order to meet the special demands for particular geographic areas, we can also offer tabulations tailored to your specific needs and geographic co-ordinates, subject to the protection of confidential data.

ET CE N'EST PAS TOUT ...

La Division des données régionales et administratives est très consciente des besoins de ses utilisateurs en matière d'information statistique. C'est pourquoi nous disposons d'un si large éventail de données «normalisées». Par ailleurs, pour satisfaire à des demandes particulières sur des régions géographiques bien précises, nous pouvons aussi offrir, à partir de vos coordonnées géographiques, des totalisations en fonction de vos besoins spécifiques, tout en respectant une protection adéquate des données confidentielles.
